DATALOGIC CONNECT
DEVICE VISIBILITY

Datalogic Connect is the new intelligent IoT Cloud-based platform that empowers organizations to remotely control, manage and get actionable insights from all their deployed Datalogic devices.

The **Device Visibility** service within Datalogic Connect platform provides customers with high-level operational visibility and insights on the health and status of all Datalogic devices.

If your organization is struggling understanding the status of the entire fleet of deployed devices, the **Device Visibility** service gives you the tool to stay in control and avoid unexpected costs.

Check how the Device Visibility service can help you during your daily operations

Tired of manual setup and bulk uploads to manage your devices?	Are you constantly chasing down devices or guessing where they are?	Do you know how productive your devices really are across multiple sites?	Are device failures slowing down your operations?	Is support and maintenance slowing your teams down?
With Auto-Discover & Instant Control, devices are detected and onboarded effortlessly — recognized, located, beeped to find, and monitored in real time for quick issue resolution and peak performance.	Now you can track every Datalogic device in real time — no more blind spots or manual checks. Know exactly where everything is, and what it's doing, at a glance.	Measure usage and performance across your fleet — from a single location to a global network — spot bottlenecks, optimize operations, and stay connected and in control from anywhere.	Get ahead of disruptions with live insights into battery health and device status. You'll know what needs attention — before it causes downtime.	Simplify everything. Manage warranties, service plans, and repair workflows from one intuitive dashboard. Less friction, faster resolution, better service.

One Platform. Infinite Insights

Datalogic Connect helps you unlock full potential from your devices and your operations — seamlessly and securely from the cloud.
Built for scalability, this brand-new platform supports a growing number of **Datalogic products**, with future updates bringing even deeper integration across the entire **Datalogic DataCapture** and **Mobile product portfolio**.

Stay ahead of the curve and contact your representative today for the latest updates and exclusive insights. Discover the list of supported devices and explore more details in the technical documentation.
